

Wow, what a fantastic idea! Do not have to grapple with rubber bands that are tied too tightly.

Use the top from a 64 oz fruit juice container for larger bags.

How to seal a bag and make it airtight!

Cut up a disposable water bottle and keep the neck and top, as in photo.

Insert the plastic bag through the neck and screw on the top to seal.

The bottle is made to be air-tight, such that water will not leak, the secret lies with the top and screw!

This is a great idea to share. Good for us and the environment too
